

## Product Sheet va-Q-pal (BC000488)

### DESCRIPTION

The va-Q-pal is a single-use container, which consists of three layers. From the outside to the inside, there is the outer protective shell (honeycomb board), an insulation layer made of 40 mm thick vacuum insulation panels (VIPs) and an inner protective cardboard leading to an outstanding temperature stability.

### DIMENSIONS AND WEIGHT

Outer Dimensions	Inner Dimensions	Tolerances	Weight	Payload
1470 x 1240 x 1580 mm <sup>3</sup>	1270 x 1040 x 1270 mm <sup>3</sup>	± 15 mm	84.0 kg ± 5 kg	1677 liters
57.9" x 48.8" x 62.2"	50.0" x 40.9" x 50.0"	± 0.6"	185.2 lbs ± 11.0 lbs	

### PERFORMANCE

The va-Q-pal has a Q-value of (2.05 ± 0.2) W/K. The va-Q-pal in combination with va-Q-accus filled with PCM is suitable for use in different temperature ranges. For more details, please view the qualification reports.
